1. Introduction

Status

MESSAGE TYPE : IFTSTA
REFERENCE DIRECTORY : D.01B
EANCOM® SUBSET VERSION : 004

Definition

A message to report the transport status and/or a change in the transport status (i.e. event) between agreed parties.

Principles

This message allows for the exchange of information regarding the status of the physical movement of consignments or goods at any point (in time or place) within the full transport chain.

A status message may be sent:

- as the result of a request or requests for information regarding a consignment or consignments;
- on a scheduled basis at predetermined times;
- on the occurrence of a selected event or events;
- on the occurrence of an exceptional event as agreed by the partners involved.

This message can relate to a status (or status's) that has (or have) been reached in a transport chain. Additionally, the message may report an exceptional status and the reason for that exceptional status.

In addition to the main principles detailed above, a number of general principles also apply;

- A consignment may contain several goods items.
- A consignment is identified by a consignor's reference number (code CU) in the CNI segment.
- Goods items may or may not be containerised.
- Goods items may be transported in one or more containers, and a single container may contain one or more goods items.
- One goods item may be related to one or more customs tariff codes.
- Goods items related to one customs tariff code may be carried in one or more containers.
- Pre-carriage (advanced haulage) and/or on-carriage (destination haulage) of goods items or equipment within one booking or instruction may take place in different steps, each step specified with its own transport details group.
- Transport devices, which have the ability of powered movement on their own, are specified in the transport details group. Other load or transport devices are specified as equipment.
- Packaging for goods items can be expressed at up to three levels.
- A goods item consists of one or more despatch units that adhere to the same package type and goods description.
- A despatch unit is the unit of cargo that will be handled and to which an SSCC can be affixed.

A number of generic transport terms are used in this specification, to be described as:

CONSIGNEE

the organisation (party) which has the intention to receive the goods.

1. Introduction

CONSIGNOR

the party ordering transport, orders a carrier to collect goods for transportation.

CONSIGNMENT

is a shipment from one or many despatch locations to one or many delivery locations for one consignor and one consignee.

CARRIER

the party contracted by the consignor or forwarder to transport goods.

DESPATCH LOCATION

the physical location from which goods for transport are shipped.

DELIVERY LOCATION

the physical location to which goods for transport are finally delivered.

EQUIPMENT

material resources necessary to facilitate the transport and handling of cargo. Transport equipment does under the given circumstances not have the ability to move by its own propulsion (e.g. sea container, trailer, unit load device, pallet).

FORWARDER

the party contracted by the consignor to arrange to have the goods transported.

GOODS ITEM

a collection of products normally grouped together for transport purposes, e.g. 12 pallets of foodstuffs.

LINE ITEM

a specific product identified and defined for trade purposes, e.g. a case of flour containing 24 packets of 250 grams.

MODE OF TRANSPORT

the method of transport used for the conveyance of goods or persons, e.g. by rail, by road, by sea.

MEANS OF TRANSPORT

the vehicle used for the transport of goods or persons, e.g. aircraft, truck, vessel.

PLACE OF ACCEPTANCE

the place at which the responsibility of the carrier starts.

PLACE OF DELIVERY

the place at which the responsibility of the carrier ends.

TYPE OF MEANS OF TRANSPORT

the type of vehicle used in the transport process, e.g. wide body, tank truck, passenger vessel.

TYPE OF EQUIPMENT

the type of material used, e.g. 40 feet container, four way pallet, mafi trailer.

4. Segments Description

Transport Status Heading Section

UNH - M 1	- Message header This segment is used to head, identify and specify a message.
BGM - M 1	- Beginning of message This segment is used to indicate the type and function of a message and to transmit the identifying number.
DTM - C 9	- Date/time/period This segment is used to specify the date of the transport status message.
SG1 - C 9	- NAD A group of segments to identify the trading partners involved in the transport status message.
NAD - M 1	- Name and address This segment is used to identify the trading partners involved in the Transport Status message. Identification of the Carrier (CA) and Consignor (CZ) is mandatory in the transport status message, either in this segment or in the NAD segment of group 6. If required, a consignee or freight forwarder may also be identified using NAD at this level in the message.
SG3 - C 9	- RFF To specify references such as shipment reference number.
RFF - M 1	- Reference This segment is used to specify references relating to a previously sent transport instruction for which a status is being requested or provided.
FTX - C 9	- Free text This segment is used to provide any free text information related to the entire message.

Transport Status Detail Section

SG4 - C 99999	- CNI-SG5 A group of segments to identify a consignment and status details relating to it.
CNI - M 1	- Consignment information This segment is used to identify a consignment for which status information is being provided. In the IFTMnn messages the consignor's shipment reference number is provided in data element 1153 of the RFF segment at the message level using the code value 'CU'.
SG5 - M 99	- STS-RFF-DTM-FTX-SG6-LOC-SG8-SG12 A group of segments indicating the status and/or identifying an event and specifying relevant details.
STS - M 1	- Status This segment is used to request or provide status information regarding the currently referenced consignment.
RFF - C 999	- Reference This segment is used to identify any reference associated with the status information in the STS segment.
DTM - C 9	- Date/time/period This segment is used to specify any dates associated with the consignment for which status information is being requested or provided.
FTX - C 9	- Free text This segment is used to provide any free text information related to the status detailed in the STS segment.

4. Segments Description

SG6 - C 9	- NAD	A group of segments to identify a party sociated with the event.
NAD - M 1	- Name and address	This segment is used to specify parties related to the status provided in the STS segment.
LOC - C 1	- Place/location identification	This segment is used to indicate a location relevant to the status provided in the STS segment.
SG8 - C 99	- TDT-SG9	A group of segments indicating conveyance details related to the status or event.
TDT - M 1	- Details of transport	This segment is used to specify transport details for the current consignment.
SG9 - C 9	- LOC-DTM	A group of segments indicating locations and dates related to the means of transport.
LOC - M 1	- Place/location identification	This segment is used to identify any locations related to the transport details specified in the previous TDT segment.
DTM - C 9	- Date/time/period	This segment is used to specify any dates relating to the transport specified in the previous TDT segment.
SG12 - C 99	- GID-SG13-SG14-SG15	A group of segments describing the goods item related to the status or event.
GID - M 1	- Goods item details	This segment is used to identify goods items for which status information is being provided in the STS segment.
SG13 - C 99	- MEA	A group of segments specifying measurements.
MEA - M 1	- Measurements	This segment is used to specify the total net and gross weight of the goods item identified in GID.
SG14 - C 99	- DIM	A group of segments specifying dimensions of a goods item.
DIM - M 1	- Dimensions	This segment is used to indicate the dimensions of the goods item identified in the GID segment.
SG15 - C 99	- PCI-GIN	A group of segments specifying marks and numbers related to the transport line items.
PCI - M 1	- Package identification	This segment is used to specify markings and labels for the line item identified in the GID segment.
GIN - C 9	- Goods identity number	This segment is used to provide the Serial Shipping Container Code marked on the packaging of the current goods item.

Transport Status Summary Section

4. Segments Description

UNT - M 1

- Message trailer

This UNT segment is a mandatory UN/EDIFACT segment. It must always be the last segment in the message.

5. Segments Layout

This section describes each segment used in the EANCOM® Transport status message. The original EDIFACT segment layout is listed. The appropriate comments relevant to the EANCOM® subset are indicated.

Notes:

1. The segments are presented in the sequence in which they appear in the message. The segment or segment group tag is followed by the (M)andatory / (C)onditional indicator, the maximum number of occurrences and the segment description.
2. Reading from left to right, in column one, the data element tags and descriptions are shown, followed by in the second column the EDIFACT status (M or C), the field format, and the picture of the data elements. These first pieces of information constitute the original EDIFACT segment layout.

Following the EDIFACT information, EANCOM® specific information is provided in the third, fourth, and fifth columns. In the third column a status indicator for the use of (C)onditional EDIFACT data elements (see 2.1 through 2.3 below), in the fourth column the restricted indicator (see point 3 on the following page), and in the fifth column notes and code values used for specific data elements in the message.

- 2.1 (M)andatory data elements in EDIFACT segments retain their status in EANCOM®.
- 2.2 Additionally, there are five types of status for data elements with a (C)onditional EDIFACT status, whether for simple, component or composite data elements. These are listed below and can be identified when relevant by the following abbreviations:

- REQUIRED	R	Indicates that the entity is required and must be sent.
- ADVISED	A	Indicates that the entity is advised or recommended.
- DEPENDENT	D	Indicates that the entity must be sent in certain conditions, as defined by the relevant explanatory note.
- OPTIONAL	O	Indicates that the entity is optional and may be sent at the discretion of the user.
- NOT USED	N	Indicates that the entity is not used and should be omitted.

- 2.3 If a composite is flagged as **N, NOT USED**, all data elements within that composite will have blank status indicators assigned to them.
3. Status indicators detailed in the fourth column which directly relate to the code values detailed in the fifth **column** may have two values:

- RESTRICTED	*	A data element marked with an asterisk (*) in the fourth column indicates that the listed codes in column five are the only codes available for use with this data element, in this segment, in this message.
- OPEN		All data elements where coded representation of data is possible and a restricted set of code values is not indicated are open (no asterisk in fourth column). The available codes are listed in the EANCOM® Data Elements and Code Sets Directory. Code values may be given as examples or there may be a note on the format or type of code to be used.

4. Different colours are used for the code values in the segment details: restricted codes are in red and open codes in blue.

5. Segments Layout

Segment number: 1

UNH - M 1 - Message header				
<p>Function:</p> <p>A service segment starting and uniquely identifying a message. The message type code for the International multimodal status report message is IFTSTA.</p> <p>Note:</p> <p>International multimodal status report messages conforming to this document must contain the following data in segment UNH, composite S009:</p> <p>Data element 0065 IFTSTA 0052 D 0054 01B 0051 UN</p>				
	EDIFACT	GS1	*	Description
0062 Message reference number	M an..14	M		Senders unique message reference. Sequence number of the messages in the interchange. DE 0062 in the UNT will be identical. Sender generated.
S009 MESSAGE IDENTIFIER	M	M		
0065 Message type	M an..6	M	*	IFTSTA = International multimodal status report message
0052 Message version number	M an..3	M	*	D = Draft version/UN/EDIFACT Directory
0054 Message release number	M an..3	M	*	01B = Release 2001 - B
0051 Controlling agency	M an..2	M	*	UN = UN/CEFACT
0057 Association assigned code	C an..6	R	*	EAN004 = GS1 version control number (GS1 Permanent Code) Indicates that the message is the EANCOM version 004 of the UNSM Transport Status.
0068 Common access reference	C an..35	N		
S010 STATUS OF THE TRANSFER	C	N		
0070 Sequence of transfers	M n..2			
0073 First and last transfer	C a1			
<p>Segment Notes:</p> <p>This segment is used to head, identify and specify a message. DE's 0065, 0052, 0054, and 0051: Indicate that the message is a UNSM Transport Status message based on the D.01B directory under the control of the United Nations.</p> <p>Example: UNH+ME000001+IFTSTA:D:01B:UN:EAN004'</p>				

5. Segments Layout

Segment number: 2

BGM - M 1 - Beginning of message				
Function: A segment indicating the beginning of a message and identifying the consignment for which status is being reported.				
		EDIFACT	GS1	* Description
C002	DOCUMENT/MESSAGE NAME	C	R	
1001	Document name code	C an..3	R	*
				44 = Transport status report 77 = Consignment status report
1131	Code list identification code	C an..17	N	
3055	Code list responsible agency code	C an..3	N	
1000	Document name	C an..35	O	
C106	DOCUMENT/MESSAGE IDENTIFICATION	C	R	
1004	Document identifier	C an..35	R	
				Transport status number assigned by the document sender. For global unique identification of documents Global Document Type Identifier (GDTI) is available.
1056	Version identifier	C an..9	N	
1060	Revision identifier	C an..6	N	
1225	Message function code	C an..3	R	*
				9 = Original 9 = Original - An original transmission of a transport status message.
4343	Response type code	C an..3	N	
Segment Notes: This segment is used to indicate the type and function of a message and to transmit the identifying number. All references other than the document number DE 1004 are to be put in the RFF segment. Example: BGM+44+569952+9'				

5. Segments Layout

Segment number: 3

DTM - C 9 - Date/time/period					
Function: A segment indicating the date of the message.					
		EDIFACT	GS1	*	Description
C507	DATE/TIME/PERIOD	M	M		
2005	Date or time or period function code qualifier	Man..3	M	*	137 = Document/message date/time
2380	Date or time or period value	C an..35	R		
2379	Date or time or period format code	C an..3	R		102 = CCYYMMDD 203 = CCYYMMDDHHMM
Segment Notes: This segment is used to specify the date of the transport status message. DE 2005: Identification of the 'Document/message date/time' (code value 137) is mandatory in an EANCOM message. Example: DTM+137:20020801:102'					

5. Segments Layout

Segment number: 4

SG1		- C	9 - NAD		
NAD		- M	1 - Name and address		
Function:					
A segment identifying a party to the consignment such as shipper or consignee.					
		EDIFACT	GS1	*	Description
3035	Party function code qualifier	M an..3	M		CA = Carrier CN = Consignee CZ = Consignor FW = Freight forwarder
C082	PARTY IDENTIFICATION DETAILS	C	A		
3039	Party identifier	M an..35	M		GLN - Format n13 For the identification of parties it is recommended to use GLN - Format n13.
1131	Code list identification code	C an..17	N		
3055	Code list responsible agency code	C an..3	R	*	9 = GS1
C058	NAME AND ADDRESS	C	O		This composite may only be used to fulfill the requirements of directive 2003/58/EC, article 4.
3124	Name and address description	M an..35	M		
3124	Name and address description	C an..35	O		
3124	Name and address description	C an..35	O		
3124	Name and address description	C an..35	O		
3124	Name and address description	C an..35	O		
C080	PARTY NAME	C	D		
3036	Party name	M an..35	M		Party Name, clear text
3036	Party name	C an..35	O		
3036	Party name	C an..35	O		
3036	Party name	C an..35	O		
3036	Party name	C an..35	O		
3045	Party name format code	C an..3	O		
C059	STREET	C	D		
3042	Street and number or post office box identifier	M an..35	M		Building Name/Number and Street
3042	Street and number or post office box identifier	C an..35	O		Name and/or P.O. Box
3042	Street and number or post office box identifier	C an..35	O		
3042	Street and number or post office box identifier	C an..35	O		
3164	City name	C an..35	D		City/Town, clear text
C819	COUNTRY SUB-ENTITY DETAILS	C	D		
3229	Country sub-entity name code	C an..9	O		
1131	Code list identification code	C an..17	O		

5. Segments Layout

Segment number: 4

		EDIFACT	GS1	*	Description
3055	Code list responsible agency code	C an..3	O		
3228	Country sub-entity name	C an..70	O		County/State, clear text.
3251	Postal identification code	C an..17	D		Postal Code
3207	Country name code	C an..3	D		ISO 3166 two alpha code

Segment Notes:

This segment is used to identify the trading partners involved in the Transport Status message. Identification of the Carrier (CA) and Consignor (CZ) is mandatory in the transport status message, either in this segment or in the NAD segment of group 6. If required, a consignee or freight forwarder may also be identified using NAD at this level in the message.

Example:

NAD+CN+5411234512309::9'
NAD+CZ+5412345123453::9'

Dependency Notes:

The following composites and data elements are only used when a coded name and address can not be used.

The affected composites and data elements are as follows:

C080 - C059 - 3164 - C819 - 3251 - 3207

5. Segments Layout

Segment number: 5

SG3 - C 9 - RFF				
RFF - M 1 - Reference				
Function:				
A segment identifying a reference which applies to the entire consignment.				
		EDIFACT	GS1	*
				Description
C506	REFERENCE	M	M	
1153	Reference code qualifier	Man..3	M	AAS = Transport document number TRI = Transport instruction number (GS1 Temporary Code)
1154	Reference identifier	C an..70	R	
1156	Document line identifier	C an..6	N	
4000	Reference version identifier	C an..35	N	
1060	Revision identifier	C an..6	N	
Segment Notes:				
This segment is used to specify references relating to a previously sent transport instruction for which a status is being requested or provided.				
Example:				
RFF+TRI:76214'				

5. Segments Layout

Segment number: 6

FTX - C 9 - Free text				
Function: A segment specifying free form or processable supplementary or other information.				
	EDIFACT	GS1	*	Description
4451 Text subject code qualifier	M an..3	M		AAI = General information ZXL = External link (GS1 Temporary code)
4453 Free text function code	C an..3	O		1 = Text for subsequent use
C107 TEXT REFERENCE	C	D		This composite is only used when trading partners have agreed to use mutually defined code values.
4441 Free text value code	M an..17	M		78E = Proof Of Delivery (GS1 Permanent Code)
1131 Code list identification code	C an..17	O		
3055 Code list responsible agency code	C an..3	D		9 = GS1 91 = Assigned by supplier or supplier's agent 92 = Assigned by buyer or buyer's agent
C108 TEXT LITERAL	C	D		This composite is only used if coded text can not be used.
4440 Free text value	M an..512	M		
4440 Free text value	C an..512	O		
4440 Free text value	C an..512	O		
4440 Free text value	C an..512	O		
4440 Free text value	C an..512	O		
3453 Language name code	C an..3	D		ISO 639 two alpha code This data element is only used when non coded free text has been provided in data element C108.
4447 Free text format code	C an..3	N		
Segment Notes: This segment is used to provide any free text information related to the entire message. Use of this segment in free form is not recommended since it may inhibit automatic processing of the Transport Status. Coded references to standard texts is an available functionality which enables automatic processing and reduces transmission overheads. Standard texts should be mutually defined between trading partners and can be used to cover legal or other requirements. Example: FTX+AAI+1+483::91' (Supplier assigned Code value 483 = Please confirm status of all outstanding deliveries.)				

5. Segments Layout

Segment number: 7

SG4 - C 99999 - CNI-SG5				
CNI - M 1 - Consignment information				
Function:				
A segment to identify a consignment for which status details are given.				
	EDIFACT	GS1	*	Description
1490 Consolidation item number	C n..4	R		Serial number differentiating each separate consignment included in the status report.
C503 DOCUMENT/MESSAGE DETAILS	C	R		
1004 Document identifier	C an..35	R		Consignor's shipment reference number
1373 Document status code	C an..3	N		
1366 Document source description	C an..70	N		
3453 Language name code	C an..3	N		
1056 Version identifier	C an..9	N		
1060 Revision identifier	C an..6	N		
1312 Consignment load sequence identifier	C n..4	O		This data element is used to indicate the sequence in which a consignment is to be, or has been, loaded.
Segment Notes:				
This segment is used to identify a consignment for which status information is being provided. In the IFTMnn messages the consignor's shipment reference number is provided in data element 1153 of the RFF segment at the message level using the code value 'CU'.				
Example:				
CNI+12+AVV23441'				

5. Segments Layout

Segment number: 8

9012	Status reason description	C an..256			
C556	STATUS REASON	C	N		
9013	Status reason description code	M an..3			
1131	Code list identification code	C an..17			
3055	Code list responsible agency	C an..3			

5. Segments Layout

Segment number: 8

	EDIFACT	GS1	*	Description
code				
9012 Status reason description	C an..256			
C556 STATUS REASON	C	N		
9013 Status reason description code	Man..3			
1131 Code list identification code	C an..17			
3055 Code list responsible agency code	C an..3			
9012 Status reason description	C an..256			
C556 STATUS REASON	C	N		
9013 Status reason description code	Man..3			
1131 Code list identification code	C an..17			
3055 Code list responsible agency code	C an..3			
9012 Status reason description	C an..256			

Segment Notes:

This segment is used to request or provide status information regarding the currently referenced consignment.

Example:

STS+1+76E::9+46'

The consignment has not been collected because payment for the transport has not yet been received.

STS+1+21'

The consignment has been delivered.

Dependency Notes:

DE 3055: This data element is only used when GS1 code values are being used in data element 9015, 4405 or 9013.

Function:

A segment identifying a reference relating to the status (e.g House Bill of Lading number).

	EDIFACT	GS1	*	Description
C506	REFERENCE	M	M	
1153	Reference code qualifier	M an..3	M	AAS = Transport document number AAU = Despatch note number ALO = Receiving advice number BM = Bill of lading number CT = Contract number CU = Consignor's reference number DQ = Delivery note number FF = Freight forwarder's reference number
1154	Reference identifier	C an..70	R	
1156	Document line identifier	C an..6	O	
4000	Reference version identifier	C an..35	N	
1060	Revision identifier	C an..6	N	

Segment Notes:

This segment is used to identify any reference associated with the status information in the STS segment.

Example:

RFF+SRN:6532'

5. Segments Layout

Segment number: 10

SG4	- C	99999 - CNI-SG5
SG5	- M	99 - STS-RFF-DTM-FTX-SG6-LOC-SG8-SG12
DTM	- C	9 - Date/time/period

Function:
A segment indicating the date and time of the status or event.

		EDIFACT	GS1	*	Description
C507	DATE/TIME/PERIOD	M	M		
2005	Date or time or period function code qualifier	M an..3	M		7 = Effective date/time 35 = Delivery date/time, actual 171 = Reference date/time 200 = Pick-up/collection date/time of cargo 334 = Status change date/time 40E = Next status date (GS1 Temporary Code)
2380	Date or time or period value	C an..35	R		
2379	Date or time or period format code	C an..3	R		102 = CCYYMMDD 203 = CCYYMMDDHHMM

Segment Notes:

This segment is used to specify any dates associated with the consignment for which status information is being requested or provided.

Example:
DTM+171:20020615:102'

5. Segments Layout

Segment number: 11

SG4	- C	99999 - CNI-SG5		
SG5	- M	99 - STS-RFF-DTM-FTX-SG6-LOC-SG8-SG12		
FTX	- C	9 - Free text		
Function:				
A segment specifying processable information relating to the status.				
	EDIFACT	GS1	*	Description
4451	Text subject code qualifier	M an..3	M	AAI = General information ACD = Reason BLR = Transport document remarks DEL = Delivery information HAN = Handling instructions TRA = Transportation information
4453	Free text function code	C an..3	O	1 =Text for subsequent use
C107	TEXT REFERENCE	C	D	This composite is only used when trading partners have agreed to use mutually defined code values.
4441	Free text value code	M an..17	M	
1131	Code list identification code	C an..17	O	
3055	Code list responsible agency code	C an..3	D	9 = GS1 91 = Assigned by supplier or supplier's agent 92 = Assigned by buyer or buyer's agent
C108	TEXT LITERAL	C	D	This composite is only used if coded text can not be used.
4440	Free text value	M an..512	M	
4440	Free text value	C an..512	O	
4440	Free text value	C an..512	O	
4440	Free text value	C an..512	O	
4440	Free text value	C an..512	O	
3453	Language name code	C an..3	D	ISO 639 two alpha code This data element is only used when non coded free text has been provided in data element C108.
4447	Free text format code	C an..3	N	
Segment Notes:				
This segment is used to provide any free text information related to the status detailed in the STS segment. Use of this segment in free form is not recommended since it may inhibit automatic processing of the Transport Status. Coded references to standard texts is an available functionality which enables automatic processing and reduces transmission overheads. Standard texts should be mutually defined between trading partners and can be used to cover legal or other requirements.				
Example: FTX+HAN++012::91' Code "012" is agreed to express = Please ensure correct storage conditions for the consignment. FTX+TRA+++NEW DELIVERY ATTEMPT TOMORROW'

6152	Range maximum value	C n..18	N		
6432	Significant digits quantity	C n..2	N		
7383	Surface or layer code	C an..3	N		

Segment Notes:
This segment is used to specify the total net and gross weight of the goods item identified in GID.

Example:
MEA+PD+AAB+GRM:1250'

5. Segments Layout

Segment number: 19

SG4	- C	99999 - CNI-SG5
SG5	- M	99 - STS-RFF-DTM-FTX-SG6-LOC-SG8-SG12
SG12	- C	99 - GID-SG13-SG14-SG15
SG14	- C	99 - DIM
DIM	- M	1 - Dimensions

Function:
A segment specifying dimensions of a goods item.

	EDIFACT	GS1	*	Description
6145 Dimension type code qualifier	M an..3	M	*	This qualifier determines the dimension values to be applied either to one single despatch unit of the goods item or to a number of despatch units of the goods item. 1 = Gross dimensions 10E = Unit gross dimensions (GS1 Temporary Code)
C211 DIMENSIONS	M	M		
6411 Measurement unit code	M an..3	M		MTR = metre
6168 Length dimension value	C n..15	O		
6140 Width dimension value	C n..15	O		
6008 Height dimension value	C n..15	O		

Segment Notes:

This segment is used to indicate the dimensions of the goods item identified in the GID segment.
All dimensions given in the DIM segments relate to the highest level packaging (the despatch units) identified in the GID segment.
When Unit Gross Dimensions are provided in this segment the dimension values provided relate to the total gross dimensions of one single despatch unit in the goods item.
When Gross Dimensions are provided the dimension values relate to the total gross weight of a number of despatch units in the goods item.

Example:
DIM+1+MTR:4:2:2'

5. Segments Layout

5. Segments Layout

Segment number: 22

UNT - M 1 - Message trailer				
Function: A service segment ending a message, giving the total number of segments in the message (including the UNH & UNT) and the control reference number of the message.				
		EDIFACT	GS1	*
				Description
0074	Number of segments in the message	M n..6	M	
				The total number of segments contained in the message is detailed here.
0062	Message reference number	M an..14	M	
				The message reference numbered detailed here should equal the one specified in the UNH segment.
Segment Notes: This UNT segment is a mandatory UN/EDIFACT segment. It must always be the last segment in the message. Example: UNT+24+ME000001'				

6. Examples

The following is an example of a transport status message between a freight forwarder identified by GLN 5422331123459 and a consignor identified by GLN 5412345123453. The message is dated the 4th of February 2002 and has the message reference number 95-455.

The message provides status information on four consignments identified by the consignment numbers 4215A, 5122C, 5145E, and 7655S.

First consignment number 4215A is reported as being delivered to the delivery party identified by GLN 5411111123451 at 14:50 on the 1st of February 2002. The delivery note number which covers the delivery is 5/2334.

Second consignment number 5122C is reported as being en route. The next report on the status is scheduled for the 7th of February 2002.

Third consignment number 5145E is reported as being refused by the customs and excise at London Heathrow Airport because of export restrictions. The refusal took place on the 15th of January 2002.

Fourth consignment number 7655S is reported as being partially lost and partially delivered. It contains 3 goods items each of which is being reported individually. Goods item 1, which was packed in a carton identified by the EAN.UCC SSCC 354107380000001051, and goods 3, which was packed on a returnable pallet identified by the EAN.UCC SSCC 354123451234567892, are reported as being delivered on the 28th of January 2002. Goods item 2, which was packed in a carton and marked with the EAN.UCC SSCC 354107380000001068 is reported as being lost. The date on which it was discovered as being lost is the 28th of January 2002.
