The Messages

1. Introduction

Status

MESSAGE TYPE : DESADV

REFERENCE DIRECTORY : D.01B

EANCOM® SUBSET VERSION : 007

Definition

A message specifying details for goods despatched or ready for despatch under agreed conditions.

Principles

The message may be used either to indicate the despatch of goods being delivered, or to indicate the despatch of goods being returned.

The message intent is to advise of the detailed contents of a consignment.

The message relates to one seller and one buyer or their respective agent.

The message relates to a single despatch point and single or multiple destination points. It may cover a number of different items and packages.

It allows the recipient to:

- know when the material has been despatched or will be ready for despatch.
- have the precise details of the consignment.
- take initial steps towards customs clearance in case of international consignments.
- enable the control between despatched goods with the following invoice.

The Despatch Advice message should always be sent before goods are physically delivered or returned. This makes it possible for the receiving party to use the data to prepare efficiently for the reception of the goods.

Each unit delivered (pallet, carton, ...) should be uniquely identified. In the Despatch Advice message, the products contained in each uniquely identified unit are described. When the goods are received, the physical shipment and the electronic message can be cross-checked. Discrepancies are immediately identified. It is recommended to use the standard EAN.UCC Serial Shipping Container Code structure to identify the units (see Part I, section 4.2).

Structure of the Despatch Advice message

The message enables a hierarchical description of the shipment, starting with the highest level (shipment) and ending with the lowest level (items). One can for example describe a container comprising 5 pallets, a pallet being composed of several large despatch units which themselves contain smaller despatch units. The traded units (any level of packaging agreed by the trading partners) are then specified.

It is however not mandatory to describe the hierarchical structure of the shipment. A simple and probably most frequent use of the message consists in specifying the items to be despatched and the relevant information per item (quantity, additional identification ...).

Example

The following example is used to illustrate the different descriptive options of the Despatch Advice message. Options 1 through 4 are presented in an ascending order of complexity or completeness.

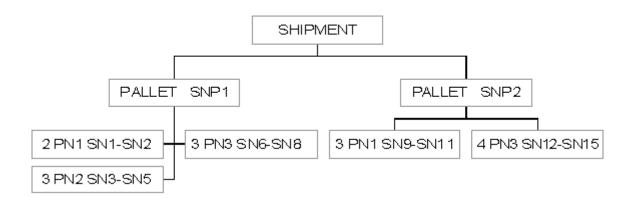

A shipment consists of 2 pallets. The first pallet, identified by the serial number SNP1, contains 8 cartons. 2 cartons of product number PN1, 3 cartons of PN2 and 3 cartons of PN3. The cartons are individually identified by serial numbers ranging from SN1 through SN8.

The second pallet identified by the serial number SNP2, contains 3 cartons of product number PN1 and 4 cartons of

1. Introduction

product number PN3. The cartons are individually identified by serial numbers ranging from SN9 through SN15.

The shipment can be represented like this:

Please note that for easy reading, the product numbers (PN's) and the serial numbers (SNP's, SN's) have been shortened. In real transactions, standard GTINs and the Serial Shipping Container Code should be used. The message structure has been simplified with only the functional segments of the detail section presented.

Option 1:

Only product numbers and total shipment quantities are provided, no carton specific serial numbers are provided and no description of the shipment structure is given.

This option allows for the description of the shipment composition only in terms of products and total quantities per product. In this case the shipment is described as being composed of 5 units of PN1, 3 units of PN2 and 7 units of PN3. Using this option, the message will provide no information regarding individual despatch carton serial numbers or the way they are organised hierarchically in the shipment, i.e. the shipment consists of two pallets, the first containing..., the second pallet containing...,.

Option 1 Detail Section of the Despatch Advice Message:

CPS+1'	"Dummy" CPS segment
LIN+1++PN1:SRV'	First line item; PN1
QTY+12:5'	Quantity Despatched 5
LIN+2++PN2:SRV'	Second line item; PN2
QTY+12:3'	Quantity Despatched 3
LIN+3++PN3:SRV'	Third line item; PN3
QTY+12:7'	Quantity Despatched 7

Option 2:

Product numbers and total quantities of the shipment are provided. Additionally, each carton is uniquely identified by a serial number. No description of the structure of the shipment is given.

This option allows for the description of the shipment composition but ignores any hierarchical structure of the shipment. In this case the shipment is described as being composed of 5 units of PN1, 3 units of PN2 and 7 units of PN3. Additionally, each carton is uniquely identified by a serial number so as to distinguish cartons with the same product number, so that for example cartons PN1 will be identified with the serial numbers SN1, SN2, SN9, SN10 and SN11. This option does not provide information on how the groups of cartons are organised in the shipment, The Messages

1. Introduction

(i.e. in terms of pallets).

Option 2 Detail Section of the Despatch Advice Message:

CPS+1' "Dummy" CPS segment

LIN+1++PN1:SRV' First line item; PN1

QTY+12:5' Quantity Despatched 5

PCI+33E' Marked packaging with SSCC

GIN+BJ+SN1:SN2+SN9:SN11' Serial numbers of 5 cartons PN1

LIN+2++PN2:SRV' Second line item; PN2

QTY+12:3' Quantity Despatched 3

PCI+33E' Marked packaging with SSCC

Serial numbers of 3 cartons PN2 GIN+BJ+SN3:SN5'

LIN+3++PN3:SRV' Third line item: PN3

QTY+12:7' Quantity Despatched 7

PCI+33E' Marked packaging with SSCC

GIN+BJ+SN6:SN8+SN12:SN15' Serial numbers of 7 cartons PN3

Option 3:

Description of the shipment hierarchical structure in terms of pallet content, with pallets uniquely identified.

This option allows to describe the composition of the shipment in terms of the pallets it contains, each pallet uniquely identified by a serial shipping container code (SNP1 and SNP2). The message describes the composition of each pallet in terms of the cartons contained and in what quantity, per pallet.

Option 3 Detail Section of the Despatch Advice Message:

CPS+1' 1st CPS; no parent

PAC+2++201' Number of packages = 2 pallets type ISO 1

CPS+2+1' 2nd CPS; first pallet; parent = shipment

PAC+1++201' Outer packaging level, pallet type ISO 1

PCI+33E' Marked packaging with SSCC

GIN+BJ+SNP1' Serial number of 1st pallet

CPS+3+2' 3rd CPS; 8 cartons; parent = pallet SNP1

PAC+8++CT' Pallet contains 8 cartons

LIN+1++PN1:SRV' First line item; PN1

QTY+12:2' Quantity Despatched 2

LIN+2++PN2:SRV' Second line item; PN2

1. Introduction

QTY+12:3' Quantity Despatched 3

LIN+3++PN3:SRV' Third line item; PN3

QTY+12:3' Quantity Despatched 3

CPS+4+1' 4th CPS; second pallet; parent = shipment

PAC+1++201' Outer packaging level, pallet type ISO 1

PCI+33E' Marked packaging with SSCC

GIN+BJ+SNP2' Serial number of 2nd pallet

CPS+5+4' 5th CPS; 7 cartons; parent = pallet SNP2

PAC+7++CT' Pallet contains 7 cartons

LIN+4++PN1:SRV' Fourth line item; PN1

QTY+12:3' Quantity Despatched 3

LIN+5++PN3:SRV' Fifth line item; PN3

QTY+12:4' Quantity Despatched 4

Option 4:

Description of the shipment hierarchical structure in terms of the pallets and their content. Both pallets and cartons contained are uniquely identified by serial numbers.

This option allows to describe the composition of the shipment in a hierarchical nature. The shipment is identified as being composed of two pallets each identified by a serial shipping container code (SNP1 and SNP2). The message describes the composition of each pallet in terms of the units contained and their serial shipping container codes. Following the same hierarchical logic the message could go on to describe the composition of each carton in terms of its traded or consumer units.

Option 4 Detail Section of the Despatch Advice Message:

CPS+1' 1st CPS; no parent

PAC+2++201' Number of packages = 2 pallets type ISO 1

2nd CPS; first pallet; parent = shipment CPS+2+1'

PAC+1++201' Outer packaging level, pallet type ISO 1

PCI+33E' Marked packaging with SSCC

GIN+BJ+SNP1' Serial number of 1st pallet

CPS+3+2' 3rd CPS; 8 cartons; parent = pallet SNP1

PAC+8++CT' Pallet contains 8 cartons

LIN+1++PN1:SRV' First line item: PN1

QTY+12:2' Quantity Despatched 2

PCI+33E' Marked packaging with SSCC

GIN+BJ+SN1:SN2' Serial numbers of 2 cartons PN1

4. Segments Description

Despatch Advice H	eading Section
UNH - M 1	- Message header
	This segment is used to head, identify and specify a message.
BGM - M 1	- Beginning of message
	This segment is used to indicate the type and function of the message and to transmit the identifying number.
DTM - C 10	- Date/time/period
	This segment is used to specify the date of the Despatch Advice or any dates related to the delivery of goods.
ALI - C 5	- Additional information
	This segment is used to indicate special conditions or the country of origin for the whole message.
MEA - C 5	- Measurements
	This segment is used to specify the physical measurements of weight and volume, and/or storage limitations of the entire shipment.
MOA - C 5	- Monetary amount
SG1 - C 10	- RFF-DTM
DEE . W. 4	A group of segments giving references where necessary, their dates relating to the whole message, e.g. contract number.
RFF - M 1	- Reference
DTM - C 1	This segment is used to provide references that apply to the whole transaction.
DIM - C 1	- Date/time/period
	This segment is used to specify dates relating to the references given in the previous RFF segment.
SG2 - C 99	- NAD-LOC-SG3-SG4
	A group of segments identifying names, addresses, and locations relevant to the whole Despatch Advice.
NAD - M 1	- Name and address
	This segment is used to identify the trading partners involved in the Despatch Advice message. Identification of the supplier and buyer is recommended in the Despatch Advice. Additionally, the shipper and delivery party may be identified when different from the supplier or buyer.
LOC - C 10	- Place/location identification
	This segment is used to indicate more precise locations related to the party identified in the NAD segment. It is recommended that GLN -Format n13 - be used for the identification of all locations.
SG3 - C 10	- RFF
RFF - M 1	A group of segments giving references relevant only to the specified party rather than the whole message. - Reference
TOTAL - IVI T	This segment is used to specify references related to the party identified in the previous NAD segment.
SG4 - C 10	- CTA-COM
22. 0.0	A group of segments to identify the people, functions, departments and appropriate numbers to whom communication should be directed.
CTA - M 1	- Contact information
	This segment is used to identify contact names within the company specified in the NAD segment.

4. Segments Description

COM - C 5	- Communication contact
	This segment identifies the communications number and type of communications, for the person or department identified in the preceding CTA segment.
SG5 - C 10	- TOD-LOC
	A group of segments indicating terms of delivery.
TOD - M 1	- Terms of delivery or transport
	This segment is used to specify the terms of delivery for the despatch advice.
LOC - C 5	- Place/location identification
	This segment is used to indicate the location to which the terms of delivery are applicable.
SG6 - C 10	- TDT-SG7
TDT - M 1	A group of segments specifying details of the mode and means of transport and date/time of departure and destination relevant to the whole despatch advice. - Details of transport
151 101 1	This segment is used to specify transport services used in the despatch advice.
SG7 - C 10	- LOC-DTM
001	A group of segments giving the location and date/time information relative to the transportation.
LOC - M 1	- Place/location identification
	This segment is used to identify a location related to the transport details specified in the previous TDT segment.
DTM - C 10	- Date/time/period
	This segment is used to provide dates related to the transport details specified in the TDT segment.
SG8 - C 10	- EQD-MEA-SEL
	A group of segments providing information relative to the equipment used for the transportation of goods relevant to the whole despatch advice.
EQD - M 1	- Equipment details
	This segment is used to provide information on equipment which will be used in the despatch of the products ordered.
MEA - C 5	- Measurements
	This segment is used to specify physical measurements or dimensions of the equipment described in the EQD segment.
SEL - C 25	- Seal number
	This segment is used to specify a seal number which is connected to the equipment identified in the EQD segment.

Despatch Advice Detail Section

SG10 - C 9999 - **CPS-SG11-SG17**

A group of segments providing details of all package levels and of the individual despatched items contained in the consignment. This segment group provides the capability to give the hierarchical packing relationships. The group defines a logical top-down order structure.

CPS - M 1 - Consignment packing sequence

This segment is used to identify the sequence in which packing of the consignment occurs.

Despatch advice message

4. Segments Description

SG11 - C 9999	- PAC-MEA-QTY-SG12-SG13
	A group of segments identifying packaging, physical dimensions, marks and numbers, quantities, handling information and information about packing at this level.
PAC - M 1	- Package
	This segment can be used to identify the total number of packages per hierarchical level identified in the CPS segment, in a shipment. The contents of each package is subsequently described in the following LIN segment.
MEA - C 10	- Measurements
	This segment is used to provide measurements relevant to the packaging unit and level described in the PAC segment.
QTY - C 10	- Quantity
	This segment is used to specify the quantity per package specified in the PAC segment.
SG12 - C 10	- HAN
HAN - M 1	A group of segments providing information on hazardous goods and handling Handling instructions
	This segment is used to provide handling instructions relevant to the packaging unit and level described in the PAC segment.
SG13 - C 1000	- PCI-RFF-DTM-SG15
PCI - M 1	A group of segments specifying markings, labels, and packing numbers Package identification
	This segment is used to provide markings and labels information relevant to the packaging unit and level identified in the PAC segment.
RFF - C 1	- Reference
	This segment is used to specify any references which relate to the package identification, e.g., master label number.
DTM - C 5	- Date/time/period
	This segment is used to specify dates relating to the references given in the preceding RFF segment and to indicate the dates marked on the package identified in the PAC segment.
SG15 - C 99	- GIN
GIN - M 1	A group of segments giving package identification numbers Goods identity number
	This segment is used to provide identification numbers relevant to the packaging unit and level identified in the PAC segment.
SG17 - C 9999	- LIN-PIA-IMD-MEA-QTY-ALI-DLM-DTM-FTX-MOA-SG18-SG20-SG22-SG25
	A group of segments providing details of the individual despatched items.
LIN - M 1	- Line item
DIA C 40	This segment is used to identify the line item being despatched.
PIA - C 10	- Additional product id
IMD 0.05	This segment is used to identify additional product codes for the current line item.
IMD - C 25	- Item description
MEA C 40	This segment is used to describe the current line item.
MEA - C 10	- Measurements
	This segment is used to specify the actual physical dimensions of the line item being despatched where the product is sold in variable lengths or volumes.

4. Segments Description

QTY - C 10	- Quantity
	This segment is used to specify the quantity of the product identified in the LIN segment which is about to be, or, has been despatched.
ALI - C 10	- Additional information
	This segment is used to indicate special conditions related to the current line item, and the country of origin.
DLM - C 100	- Delivery limitations
	This segment is used to specify any limitations on the delivery, e.g., Quality Control.
DTM - C 5	- Date/time/period
	This segment is used to specify relevant dates (and possibly times) and periods of the product which is about to be, or, has been despatched.
FTX - C 99	- Free text
	This segment is used to provide free form or coded text information.
MOA - C 5	- Monetary amount
	This segment can be used to specify monetary amounts related to the line item, acting as indicative price, pre-advice to the recipient, or required by the consignee to prepare customs clearance procedures.
SG18 - C 99	- RFF-DTM
RFF - M 1	A group of segments to give reference numbers and dates Reference
	This segment is used to specify any references which are for the line item only.
DTM - C 1	- Date/time/period
	This segment is used to specify dates relating to the references given in the preceding RFF segment.
SG20 - C 100	- LOC-NAD-DTM-QTY
	A group of segments giving location information and where relevant, additional addresses, date and time, and quantities.
LOC - M 1	- Place/location identification
	This segment may be used for 3 distinct purposes. 1. This segment is used to identify the location of delivery for a split delivery despatch advice.
	2. This segment can also be used to identify a delivery location for a specific line item which might be different to the delivery location specified in the NAD or LOC
	segment in the heading section. 3. This segment can be used as well to specify traceability information for a specific line item. E.g. in the case of a meat product the processing country or processing facility in order to comply with legal requirements.
NAD - C 1	- Name and address
	This segment is used only when the ultimate delivery location identification cannot be codified using the previous LOC segment.
DTM - C 1	- Date/time/period
	This segment is used to indicate the date on which the delivery or split delivery will take place to the location identified in the LOC segment.
QTY - C 10	- Quantity
	This segment is used to indicate the delivery quantity for the delivery location specified in the previous LOC segment. The total of all quantities specified in the current segment group for the line must equal the value for the total quantity detailed in the QTY segment at line level.

4. Segments Description

5033 C 0000	DCI DTM MEA OTV SC22 SC24
SG22 - C 9999	- PCI-DTM-MEA-QTY-SG23-SG24
	A group of segments identifying one specific package or a number of packages, their marks and numbers, measurements, quantities and date and time information.
PCI - M 1	- Package identification
	This segment is used to provide markings and labels information relevant to the product identified in the LIN segment.
DTM - C 5	- Date/time/period
	This segment is used to provide pertinent date and time details relating to the PCI segment.
MEA - C 10	- Measurements
	This segment is used to provide measurements relevant to the packaging unit identified in the PCI segment.
QTY - C 1	- Quantity
	This segment is used to define quantities contained relevant to the PCI segment.
SG23 - C 10	- GIN-DLM
	A group of segments giving package identification numbers and, where relevant, delivery limitation information.
GIN - M 1	- Goods identity number
	This segment is used to provide identification numbers relevant to the packaging of the current line item.
DLM - C 100	- Delivery limitations
	This segment is used to specify any limitations on the delivery, e.g., Quality Control, for the packaging identified in the PCI segment.
SG24 - C 10	- HAN
HAN - M 1	A group of segment providing information on hazardous materials and handling Handling instructions
	This segment is used to provide handling instructions.
SG25 - C 10	- QVR-DTM
	A group of segments identifying quantity variances, the reason for the variance, and, when relevant, date and time information.
QVR - M 1	- Quantity variances
	This segment is used to specify any variances between what was ordered and what is ready for or has been despatched.
DTM - C 5	- Date/time/period
	This segment is used to specify dates relevant to the quantity variance specified in the preceding QVR segment.

Despatch Advice Summary Section

CNT - C 5	- Control total
	This segment is used to provide message control information for checking on the message receiver's in-house system.

UNT - M 1 - Message trailer

This segment is a mandatory UN/EDIFACT segment. It must always be the last segment in the message.

The Messages

5. Segments Layout

This section describes each segment used in the EANCOM® Despatch Advice message. The original EDIFACT segment layout is listed. The appropriate comments relevant to the EANCOM® subset are indicated.

Notes:

- The segments are presented in the seguence in which they appear in the message. The segment or segment 1. group tag is followed by the (M)andatory / (C)onditional indicator, the maximum number of occurrences and the segment description.
- Reading from left to right, in column one, the data element tags and descriptions are shown, followed by in 2. the second column the EDIFACT status (M or C), the field format, and the picture of the data elements. These first pieces of information constitute the original EDIFACT segment layout.

Following the EDIFACT information, EANCOM® specific information is provided in the third, fourth, and fifth columns. In the third column a status indicator for the use of (C)onditional EDIFACT data elements (see 2.1 through 2.3 below), in the fourth column the restricted indicator (see point 3 on the following page), and in the fifth column notes and code values used for specific data elements in the message.

- 2.1 (M)andatory data elements in EDIFACT segments retain their status in EANCOM®.
- 2.2 Additionally, there are five types of status for data elements with a (C)onditional EDIFACT status, whether for simple, component or composite data elements. These are listed below and can be identified when relevant by the following abbreviations:

- REQUIRED	R	Indicates that the entity is required and must be sent.
- ADVISED	A	Indicates that the entity is advised or recommended.
- DEPENDENT	D	Indicates that the entity must be sent in certain conditions, as defined by the relevant explanatory note.

- OPTIONAL Indicates that the entity is optional and may be sent at the discretion of the user.
- NOT USED Indicates that the entity is not used and should be omitted. Ν
- 2.3 If a composite is flagged as N, NOT USED, all data elements within that composite will have blank status indicators assigned to them.
- 3. Status indicators detailed in the fourth column which directly relate to the code values detailed in the fifth column may have two values:
- RESTRICTED A data element marked with an asterisk (*) in the fourth column indicates that the listed codes in column five are the only codes available for use with this data element, in this segment, in this message.
 - OPEN All data elements where coded representation of data is possible and a restricted set of code values is not indicated are open (no asterisk in fourth column). The available codes are listed in the EANCOM® Data Elements and Code Sets Directory. Code values may be given as examples or there may be a note on the format or type of code to be used.
- 4. Different colours are used for the code values in the segment details: restricted codes are in red and open codes in blue.

5. Segments Layout

Segment number: 1

UNH - M 1 - Message header

Function:

A service segment starting and uniquely identifying a message. The message type code for the Despatch advice message is DESADV.

Note:

Despatch advice messages conforming to this document must contain the following data in segment UNH, composite S009:

Data element 0065 DESADV

0052 D 0054 01B 0051 UN

		EDIFACT	GS1	*	Description
0062	Message reference number	M an14	M		Senders unique message reference. Sequence number of the messages in the interchange. DE 0062 in the UNT will be identical. Sender generated.
S009	MESSAGE IDENTIFIER	M	M		
0065	Message type	M an6	M	*	DESADV = Despatch advice message
0052	Message version number	M an3	M	*	D = Draft version/UN/EDIFACT Directory
0054	Message release number	M an3	M	*	01B = Release 2001 - B
0051	Controlling agency	M an2	M	*	UN = UN/CEFACT
0057	Association assigned code	C an6	R	*	EAN007 = GS1 version control number (GS1 Permanent Code) Indicates that the message is the EANCOM version 007 of the UNSM Despatch Advice.
0068	Common access reference	C an35	N		
S010	STATUS OF THE TRANSFER	С	N		
0070	Sequence of transfers	M n2			
0073	First and last transfer	C a1			

Segment Notes:

This segment is used to head, identify and specify a message.

DE's 0065, 0052, 0054, and 0051: Indicate that the message is a UNSM Despatch Advice message based on the D.01B directory under the control of the United Nations.

Example:

UNH+ME000001+DESADV:D:01B:UN:EAN007'

					4 = Change
					5 = Replace
					7 = Duplicate
					9 = Original
					31 = Copy
					42 = Confirmation via specific means
					The message function, coded is a critical data
					element in this segment. It applies to all data indicated
					in the message. Consequently, one separate
					message has to be provided per type of function
					required. The following definitions apply for the
					restricted codes:
					1 = Cancellation - A cancellation of a previously sent
					despatch advice. The previous despatch advice
					number is specified in the RFF segment.
					4 = Change - A change to a previously sent despatch
					advice. Only the area's changing need to be
					retransmitted. The previous despatch advice number
					is specified in the RFF segment.
					5 = Replace - The current message cancels and
					replaces a previously sent instruction to despatch

2379	Date or time or period format code	C an3	R		102 = CCYYMMDD 718 = CCYYMMDD-CCYYMMDD

Segment Notes:

This segment is used to specify dates relating to the references given in the previous RFF segment.

Example:

DTM+171:20021101:102'

© Copyright GS1 - 33 - Edition 2014

5. Segments Layout

Segment number: 9

SG2	- C	99 - NAD-LOC-SG3-SG4
NAD	- M	1 - Name and address

Function:

A segment for identifying names, addresses, and their functions relevant to the whole Despatch Advice. Identification of the parties involved is recommended for the Despatch Advice message, and is to be given in the NAD segment.

It is recommended that where possible, only the coded form of the party ID should be specified, e.g. the buyer and seller are known to each other, thus only the coded ID is required. The consignee or delivery address may vary and would have to be clearly specified, preferably in structured format.

		EDIFACT	GS1	*	Description
3035 Party function code qualifier		M an3	M		BY = Buyer DP = Delivery party DEQ = Shipper SU = Supplier UC = Ultimate consignee
C082	PARTY IDENTIFICATION DETAILS	С	A		
3039 Party identifier		M an35	M		GLN - Format n13 For identification of parties it is recommended to use GLN - Format n13.
1131	Code list identification code	C an17	N		
3055	3055 Code list responsible agency code		R	*	9 = GS1
C058	NAME AND ADDRESS	С	O		This composite may only be used to fulfill the requirements of directive 2003/58/EC, article 4.
3124	Name and address description	M an35	M		
3124	Name and address description	C an35	O		
3124	Name and address description	C an35	0		
3124	Name and address description	C an35	O		
3124	Name and address description	C an35	O		
C080	PARTY NAME	C	D		
3036	Party name	M an35	M		Party Name in clear text.
3036	Party name	C an35	0		
3036	Party name	C an35	0		
3036	Party name	C an35	0		
3036	Party name	C an35	0		
3045	Party name format code	C an3	0		
C059	STREET	С	D		
3042	Street and number or post office box identifier	M an35	M		Building Name/Number and Street
3042	Street and number or post office box identifier	C an35	O		Name and/or P.O. Box
3042	Street and number or post office box identifier	C an35	O		
3042	Street and number or post office box identifier	C an35	О		

5. Segments Layout

Segment number: 9

		EDIFACT	GS1	*	Description
3164	3164 City name		D		City/Town, clear text.
C819 COUNTRY SUB-ENTITY DETAILS		С	D		
3229 Country sub-entity name code		C an9	О		
1131 Code list identification code		C an17	О		
3055 Code list responsible agency code		C an3	O		
3228 Country sub-entity name		C an70	0		County/State, clear text.
3251	3251 Postal identification code		D		Postal Code
3207 Country name code		C an3	D		ISO 3166 two alpha code

Segment Notes:

This segment is used to identify the trading partners involved in the Despatch Advice message. Identification of the supplier and buyer is recommended in the Despatch Advice. Additionally, the shipper and delivery party may be identified when different from the supplier or buyer.

The delivery address in NAD is the main delivery address valid for all line items. It can be overridden at line level by the use of the Segment Group 20 (LOC-NAD-DTM-QTY) in which multiple delivery addresses can be specified for split deliveries.

Example:

NAD+BY+5411234512300::9' NAD+SU+5412345123450::9'

Dependency Notes:

The following composites and data elements are only used when a coded name and address can not be used.

The affected composites and data elements are as follows:

C080 - C059 - 3164 - C819 - 3251 - 3207

5. Segments Layout

Segment number: 10

SG2	- C	99 - NAD-LOC-SG3-SG4
LOC	- C	10 - Place/location identification

Function:

A segment indicating more details regarding specific places/locations related to the party specified in the NAD segment, e.g. internal site/building number.

		EDIFACT	GS1	*	Description
3227	3227 Location function code qualifier		M		7 = Place of delivery
C517 LOCATION IDENTIFICATION		С	A		
3225 Location name code		C an25	A		Use GLN - Format n13. If not applicable, use codes from another appropriate code set.
1131	Code list identification code	C an17	0		
3055 Code list responsible agency code		C an3	D		9 = GS1 92 = Assigned by buyer or buyer's agent
3224	Location name	C an256	О		
C519	RELATED LOCATION ONE IDENTIFICATION	С	N		
3223	First related location name code	C an25			
1131	Code list identification code	C an17			
3055	Code list responsible agency code	C an3			
3222	First related location name	C an70			
C553	RELATED LOCATION TWO IDENTIFICATION	С	N		
3233	Second related location name code	C an25			
1131	Code list identification code	C an17			
3055	Code list responsible agency code	C an3			
3232	Second related location name	C an70			
5479	Relation code	C an3	N		

Segment Notes:

This segment is used to indicate more precise locations related to the party identified in the NAD segment. It is recommended that GLN -Format n13 - be used for the identification of all locations.

Example:

LOC+7+5412345123472::9'

5. Segments Layout

Segment number: 11

SG2	- C	99 - NAD-LOC-SG3-SG4
SG3	- C	10 - RFF
RFF	- M	1 - Reference

Function:

A segment for referencing documents relating to the party specified by the NAD segment.

		EDIFACT	GS1	*	Description
C506	REFERENCE	M	M		
1153	Reference code qualifier	M an3	M	*	ABP = Declarant's Customs identity number AMT = Goods and Services Tax identification number AVQ = Place of packing approval number YC1 = Additional party identification (GS1 Temporary Code) GN = Government reference number IA = Internal vendor number IT = Internal customer number VA = VAT registration number

1156	Document line identifier	C an6	N		
4000	Reference version identifier	C an35	N		
1060	Revision identifier	C an6	N		

Segment Notes:

This segment is used to specify references related to the party identified in the previous NAD segment.

Example:

RFF+VA:6558774'

© Copyright GS1 - 37 - Edition 2014

5. Segments Layout

Segment number: 12

SG2	- C	99 - NAD-LOC-SG3-SG4
SG4	- C	10 - CTA-COM
CTA	- M	1 - Contact information

Function:

A segment to identify the person, function or department to whom communication should be directed.

		EDIFACT	GS1	*	Description
3139	Contact function code	C an3	R		DL = Delivery contact TR = Transport contact
C056	DEPARTMENT OR EMPLOYEE DETAILS	С	О		
3413	Department or employee name code	C an17	O		
3412	Department or employee name	C an35	O		

Segment Notes:

This segment is used to identify contact names within the company specified in the NAD segment. The use of GLN location codes - Format n13 - is particularly suitable for this purpose.

Example:

CTA+TR+:W MILLS' CTA+TR+54123450000013'

Segment number: 13

SG2	- C	99 - NAD-LOC-SG3-SG4
SG4	- C	10 - CTA-COM
COM	- C	5 - Communication contact

Function:

A segment to identify communication types and numbers for the person, function or department identified in the CTA.

		EDIFACT	GS1	*	Description
C076	COMMUNICATION CONTACT	M	M		
3148	Communication address identifier	M an512	M		
3155	Communication address code qualifier	M an3	M		EM = Electronic mail TE = Telephone WWW = WWW-Site (GS1 Temporary Code)

Segment Notes:

This segment identifies the communications number and type of communications, for the person or department identified in the preceding CTA segment.

Example:

Segment Notes:

This segment is used to identify a location related to the transport details specified in the previous TDT segment.

Example:

LOC+5+5412345678908::9'

Segment number: 18

SG6	- C	10 - TDT-SG7
SG7	- C	10 - LOC-DTM
DTM	- C	10 - Date/time/period

Function:

A segment giving the date/time/period information of departure and/or arrival of the transported goods for the specified location.

		EDIFACT	GS1	*	Description
C507	DATE/TIME/PERIOD	M	M		
2005	Date or time or period function code qualifier	M an3	M	*	11 = Despatch date and/or time 17 = Delivery date/time, estimated 189 = Departure date/time, scheduled 232 = Arrival date/time, scheduled 54E = Stuffing date/time (GS1 Temporary Code)
2380	Date or time or period value	C an35	R		
2379	Date or time or period format code	C an3	R		102 = CCYYMMDD 203 = CCYYMMDDHHMM 718 = CCYYMMDD-CCYYMMDD

Segment Notes:

This segment is used to provide dates related to the transport details specified in the TDT segment.

Example:

DTM+189:20021001:102'

© Copyright GS1 - 45 - Edition 2014

Segment number: 19

SG8	- C	10 - EQD-MEA-SEL
EQD	- M	1 - Equipment details

Function:

A segment to define fixed information regarding equipment used in conjunction with the whole despatch advice, and if required, to indicate responsibility for supply of the equipment.

		EDIFACT	GS1	*	Description
8053	Equipment type code qualifier	M an3	M		BPN = Box pallet non exchangeable CN = Container EFP = Exchangeable EUR flat pallet PA = Pallet UL = ULD (Unit load device)
C237	EQUIPMENT IDENTIFICATION	С	O		
8260	Equipment identifier	C an17	A		
1131	Code list identification code	C an17	0		
3055	Code list responsible agency code	C an3	D		9 = GS1
3207	Country name code	C an3	0		
C224	EQUIPMENT SIZE AND TYPE	C	0		
8155	Equipment size and type description code	C an10	О		
1131	Code list identification code	C an17	O		
3055	Code list responsible agency code	C an3	D		
8154	Equipment size and type description	C an35	O		
8077	Equipment supplier code	C an3	О		1 = Shipper supplied 2 = Carrier supplied
8249	Equipment status code	C an3	0		
8169	Full or empty indicator code	C an3	O		

Segment Notes:

This segment is used to provide information on equipment which will be used in the despatch of the products ordered.

Example:

EQD+UL+93221'

Segment number: 20

SG8 - C 10 - EQD-MEA-SEL

MEA - C 5 - Measurements

Function:

A segment specifying physical measurements of equipment described in the EQD segment.

		EDIFACT	GS1	*	Description
6311	Measurement purpose code qualifier	M an3	M		AAH = Dimensions total weight PD = Physical dimensions (product ordered)
C502	MEASUREMENT DETAILS	С	A		
6313	Measured attribute code	C an3	A		AAA = Unit net weight AAB = Unit gross weight DBX = Degree BRIX (GS1 Temporary Code) DN = Density HT = Height dimension LN = Length dimension UCO = Units per package (GS1 Temporary Code) WD = Width dimension X12 = Area (GS1 Temporary Code)
6321	Measurement significance code	C an3	O		3 = Approximately 4 = Equal to
6155	Non-discrete measurement name code	C an17	O		
6154	Non-discrete measurement name	C an70	N		
C174	VALUE/RANGE	С	R		
6411	Measurement unit code	M an3	M		CEL = degree celsius GRM = gram KGM = kilogram MMT = millimetre
6314	Measurement value	C an18	0		
6162	Range minimum value	C n18	0		
6152	Range maximum value	C n18	0		
6432	Significant digits quantity	C n2	N		
7383	Surface or layer code	C an3	N		

Segment Notes:

This segment is used to specify physical measurements or dimensions of the equipment described in the EQD segment.

Example:

MEA+PD+AAB+GRM:1250'

© Copyright GS1 - 47 - Edition 2014

5. Segments Layout

Segment number: 21

 SG8
 - C
 10 - EQD-MEA-SEL

 SEL
 - C
 25 - Seal number

Function:

A segment specifying a seal number connected to a specific equipment named in the EQD.

		EDIFACT	GS1	*	Description
9308	Seal identifier	C an35	R		
C215	SEAL ISSUER	С	A		
9303	Sealing party name code	C an3	R		CA = Carrier CU = Customs SH = Shipper
1131	Code list identification code	C an17	О		
3055	Code list responsible agency code	C an3	D		
9302	Sealing party name	C an35	O		
4517	Seal condition code	C an3	N		
C208	IDENTITY NUMBER RANGE	С	N		
7402	Object identifier	M an35			
7402	Object identifier	C an35			

Segment Notes:

This segment is used to specify a seal number which is connected to the equipment identified in the EQD segment.

Example:

SEL+21876+CU'

5. Segments Layout

Segment number: 22

SG10 - C 9999 - CPS-SG11-SG17
CPS - M 1 - Consignment packing sequence

Function:

A segment identifying the sequence in which packing of the consignment occurs, e.g. boxes loaded onto a pallet.

		EDIFACT	GS1	*	Description
7164	Hierarchical structure level identifier	M an35	M		Sequential numbering recommended.
7166	Hierarchical structure parent identifier	C an35	A		
7075	Packaging level code	C an3	0		1E = Highest (GS1 Temporary Code) 4 = No packaging hierarchy 5 = Shipment Level The code '1E = Highest' can be used if a user wants explicitly identify that the CPS group is for the total shipment level. Code 4: Australian retailer has a requirement to capture a packaging level hierarchy that is non defined. It is used to define a level of packaging grouped to go to a specific location. It will allow users to group orders to go to specific locations and clearly delineate the extra level.

Segment Notes:

This segment is used to identify the sequence in which packing of the consignment occurs.

Please refer to the Structure of the Despatch Advice Message section in the introduction for details on the use of the CPS segment.

Example:

CPS+1'

C208	IDENTITY NUMBER RANGE	С	0		
7402	Object identifier	M an35	M		
7402	Object identifier	C an35	О		

Segment Notes:

This segment is used to provide identification numbers relevant to the packaging unit and level identified in the PAC segment.

Example:

GIN+BJ+354123450000000014:354123450000000106'

Segment number: 31

SG10	- C	9999 - CPS-SG11-SG17
SG17	- C	9999 - LIN-PIA-IMD-MEA-QTY-ALI-DLM-DTM-FTX-MOA-SG18-SG20-SG22-SG25
LIN	- M	1 - Line item

Function:

A segment identifying the product being despatched.

All other segments in the detail section following the LIN segment refer to that line item.

		EDIFACT	GS1	*	Description
1082	Line item identifier	C an6	R		Application generated number of the item lines within the Despatch Advice.
1229	Action request/notification description code	C an3	N		
C212	ITEM NUMBER IDENTIFICATION	С	D		This composite is only used for the identification of GS1 codes. If another coding structure is required, e. g. HIBC, this composite will not be used and the code will be detailed in the PIA segment.
7140	Item identifier	C an35	R		Format n14 GTIN - this is the number of the article being despatched.
7143	Item type identification code	C an3	R	*	SRV = GS1 Global Trade Item Number
1131	Code list identification code	C an17	N		
3055	Code list responsible agency code	C an3	N		
C829	SUB-LINE INFORMATION	С	D		
5495	Sub-line indicator code	C an3	R	*	1 = Sub-line information
1082	Line item identifier	C an6	R		
1222	Configuration level number	C n2	N		
7083	Configuration operation code	C an3	N		

Segment Notes:

This segment is used to identify the line item being despatched.

If Global Trade Item Numbers are available it is mandatory to use GTIN within the LIN segment.

Example:

LIN+1++5412345123453:SRV'

Dependency Notes:

C829 is only used when sub-lines are required.

FOR A COMPLETE DESCRIPTION ON THE USAGE OF SUB-LINES PLEASE REFER TO PART I, SECTION 4.10.

Segment number: 32

SG10	- C	9999 - CPS-SG11-SG17
SG17	- C	9999 - LIN-PIA-IMD-MEA-QTY-ALI-DLM-DTM-FTX-MOA-SG18-SG20-SG22-SG25
PIA	- C	10 - Additional product id

Function:

A segment providing additional product identification.

		EDIFACT	GS1	*	Description
4347	Product identifier code qualifier	M an3	М	*	1 = Additional identification 3 = Substituted by 4 = Substituted for 5 = Product identification Product Id function, coded has the following restricted coded functions: 1 = Additional Identification - To provide an additional identity for the primary article number identified in the LIN segment. The additional code can consist of: A supplemental identification which provides more information complementary to the main trade item number provided in the LIN segment, e.g., a batch number, promotional variant number, etc., An alternative identification which may be used instead of the main trade item number provided in the LIN segment, e.g., a buyer's article number, an HIBC code, etc., 3 = Substituted By - To provide the trade item number of a product which has substituted the product identified by the trade item number in the LIN segment. In the despatch advice this function code may be used to inform trading partners of the trade item number of the product originally ordered which has been substituted by another product identified in the LIN segment. 4 = Substituted For - To provide the trade item number provided in the LIN segment. In the despatch advice this function code may be used to inform trading partners of the trade item number provided in the LIN segment. In the despatch advice this function code may be used to inform trading partners of the trade item number of the product identified by the trade item number of the product originally ordered which has been substituted by another product identified in the LIN segment. In this case, the segment LIN will refer to the despatched product and the PIA segment will provide the trade item number of the unavailable product. 5 - Product Identification - To provide the primary product identification code when no GTIN has been provided in the LIN segment.
C212	ITEM NUMBER IDENTIFICATION	M	M		
7140	Item identifier	C an35	R		
7143	Item type identification code	C an3	R		AC = HIBC (Health Industry Bar Code) IB = ISBN (International Standard Book Number) IN = Buyer's item number PV = Promotional variant number

Segment number: 32

		EDIFACT	GS1	*	Description
					SA = Supplier's article number SRV = GS1 Global Trade Item Number X1 = Slaughter number (GS1 Temporary Code) X2 = Ear-tag number (GS1 Temporary Code)
1131	Code list identification code	C an17	0		
3055	Code list responsible agency code	C an3	D		9 = GS1 91 = Assigned by supplier or supplier's agent 92 = Assigned by buyer or buyer's agent
C212	ITEM NUMBER IDENTIFICATION	С	O		
7140	Item identifier	C an35	R		
7143	Item type identification code	C an3	R		
1131	Code list identification code	C an17	0		
3055	Code list responsible agency code	C an3	D		
C212	ITEM NUMBER IDENTIFICATION	С	O		
7140	Item identifier	C an35	R		
7143	Item type identification code	C an3	R		
1131	Code list identification code	C an17	0		
3055	Code list responsible agency code	C an3	D		
C212	ITEM NUMBER IDENTIFICATION	С	O		
7140	Item identifier	C an35	R		
7143	Item type identification code	C an3	R		
1131	Code list identification code	C an17	0		
3055	Code list responsible agency code	C an3	D		
C212	ITEM NUMBER IDENTIFICATION	С	O		
7140	Item identifier	C an35	R		
7143	Item type identification code	C an3	R		
1131	Code list identification code	C an17	0		
3055	Code list responsible agency code	C an3	D		

Segment Notes:

This segment is used to identify additional product codes for the current line item.

Examples:

PIA+1+ABF5682:BP'

In this example the PIA segment is used to provide an additional identification to the trade item number provided in the LIN segment. The GTIN 5412345123453 provided in the LIN segment refers to the internal buyer's part number ABF5682.

EANCOM® 2002 S3 Part II

DESADV Despatch advice message

5. Segments Layout

Segment number: 32

PIA+3+5412345123095:SRV'

In this example the PIA segment is used to provide the trade item number of the product by which the product identified in the LIN segment by the GTIN 5412345123095 has been substituted.

PIA+4+5412345123095:SRV'

In this example the PIA segment is used to provide the GTIN of the product which has been substituted by the former primary GTIN . The new GS1 article 5412345111184 would be included in the message in the LIN segment.

PIA+5+2209953C001L:AC'

This example details the HIBC code 2209953C001L which is provided as the primary product code because no GTIN was provided in the LIN segment.

IMD	- C	25 - Item description

Function:

A segment for describing the product being despatched. This segment should be used for products that cannot be identified by a product code or article number.

		EDIFACT	GS1	*	Description
7077	Description format code	C an3	R	*	A = Free-form long description C = Code (from industry code list) E = Free-form short description F = Free-form S = Structured (from industry code list) B = Code and text
C272	ITEM CHARACTERISTIC	С	0		
7081	Item characteristic code	C an3	R		
1131	Code list identification code	C an17	O		
3055	Code list responsible agency code	C an3	D	*	9 = GS1 Must be used if DE7081 contains an GS1 code.
C273	ITEM DESCRIPTION	C	A		
7009	Item description code	C an17	0		CU = Consumer unit (GS1 Permanent Code) DU = Despatch unit (GS1 Permanent Code) TU = Traded unit (GS1 Permanent Code) VQ = Variable quantity product (GS1 Permanent Code)
1131	Code list identification code	C an17	O		
3055	Code list responsible agency code	C an3	D		9 = GS1 91 = Assigned by supplier or supplier's agent 92 = Assigned by buyer or buyer's agent
7008	Item description	C an256	0		
7008	Item description	C an256	0		
3453	Language name code	C an3	0		
7383	Surface or layer code	C an3	N		

Segment Notes:

This segment is used to describe the current line item.

It is recommended to use this segment only for coded descriptions. Data element 7008 in clear text should only be used when no product code is available or when free-form descriptions are required by trading partners.

Example:

IMD+C++TU::9'

IMD+F++:::CORN CRISPIES'

Segment number: 34

SG10	- C	9999 - CPS-SG11-SG17
SG17	- C	9999 - LIN-PIA-IMD-MEA-QTY-ALI-DLM-DTM-FTX-MOA-SG18-SG20-SG22-SG25
MEA	- C	10 - Measurements

Function:

A segment specifying physical measurements of the despatched item in original or unpacked form.

EDIFACT			GS1	*	Description	
6311	Measurement purpose code qualifier	M an3	M		PD = Physical dimensions (product ordered)	
C502	MEASUREMENT DETAILS	C	R			
6313	Measured attribute code	C an3	A	*	AAK = Fat content DI = Diameter DP = Depth HT = Height dimension LN = Length dimension TH = Thickness X13 = Acidity of meat (GS1 Temporary Code)	
6321	Measurement significance code	C an3	О		3 = Approximately 4 = Equal to	
6155	Non-discrete measurement name code	C an17	N			
6154	Non-discrete measurement name	C an70	N			
C174	VALUE/RANGE	С	R			
6411	Measurement unit code	M an3	M		CMT = centimetre FOT = foot MMT = millimetre MTR = metre YRD = yard	
6314	Measurement value	C an18	О			
6162	Range minimum value	C n18	0			
6152	Range maximum value	C n18	0			
6432	Significant digits quantity	C n2	N			
7383	Surface or layer code	C an3	N			

Segment Notes:

This segment is used to specify the actual physical dimensions of the line item being despatched where the product is sold in variable lengths or volumes.

This segment must be used in conjunction with the LIN segment for the precise identification of the despatched product.

Example:

MEA+PD+LN:4+MTR:8'

The precise length of the product identified by the GTIN 5412345123453 is 8 metres.

Segment number: 35

SG10	- C	9999 - CPS-SG11-SG17
SG17	- C	9999 - LIN-PIA-IMD-MEA-QTY-ALI-DLM-DTM-FTX-MOA-SG18-SG20-SG22-SG25
QTY	- C	10 - Quantity

Function:

A segment to give quantity information concerning the product.

		EDIFACT	GS1	*	Description
C186	QUANTITY DETAILS	M	M		
6063	Quantity type code qualifier	M an3	M	*	12 = Despatch quantity 21 = Ordered quantity 59 = Number of consumer units in the traded unit 61 = Return quantity 121 = Over shipped 192 = Free goods quantity 193 = Free quantity included 45E = Number of units in higher packaging or configuration level (GS1 Temporary Code)
6060	Quantity	M an35	M		
6411	Measurement unit code	C an3	D		KGM = kilogram This DE is only used if the product being identified is of variable quantity.

Segment Notes:

This segment is used to specify the quantity of the product identified in the LIN segment which is about to be, or, has been despatched.

Example:

QTY+12:400'

7161	Special service description code	C an3	0		0 = Released (GS1 Temporary Code) 1 = Quality control held (GS1 Temporary Code) 2 = Quality controlled embargo (GS1 Temporary Code) The special services data element can be used by a manufacturer to inform an internal warehouse or third party stockholder of the quality control status of the despatched goods, or goods ready to be despatched. The following codes apply: 0 = Released - informs the stockholder it is free to distribute the quality controlled passed goods already despatched or ready to be despatched. 1 = Quality Control Held - instructs the stockholder to withhold distribution of the goods already despatched or ready to be despatched until the manufacturer has completed a quality control assessment. Usually the stockholder will receive the whole consignment and the manufacturer will run quality control tests on production batches contained in the consignment. Once the manufacturer completes a positive quality control assessment, it communicates by other means a quality assurance certificate which releases the goods for further distribution by the stockholder. 2 = Quality Controlled Embargo - instructs the stockholder to withhold distribution of the goods already despatched or ready to be despatched, when some of the goods of the same production batch as goods contained in the consignment have failed quality control tests.

Segment number: 39

SG10	- C	9999 - CPS-SG11-SG17
SG17	- C	9999 - LIN-PIA-IMD-MEA-QTY-ALI-DLM-DTM-FTX-MOA-SG18-SG20-SG22-SG25
FTX	- C	99 - Free text

Function:

A segment with free text information in coded or clear form to give further clarification, when required, to the line item. In computer to computer exchanges such text will normally require the receiver to process this segment manually.

		EDIFACT	GS1	*	Description
4451	Text subject code qualifier	M an3	M		GEN = Entire transaction set ZZZ = Mutually defined
4453	Free text function code	C an3	0	*	1 = Text for subsequent use
C107	TEXT REFERENCE	С	D		This composite is only used when trading partners have agreed to use mutually defined code values.
4441	Free text value code	M an17	M		002 = Standard text
1131	Code list identification code	C an17	0		
3055	Code list responsible agency code	C an3	D		91 = Assigned by supplier or supplier's agent 92 = Assigned by buyer or buyer's agent
C108	TEXT LITERAL	С	D		This composite is only used if coded text can not be used.
4440	Free text value	M an512	M		
4440	Free text value	C an512	0		
4440	Free text value	C an512	0		
4440	Free text value	C an512	0		
4440	Free text value	C an512	O		
3453	Language name code	C an3	D		ISO 639 two alpha code This data element is only used when non coded free text has been provided in data element C108.
4447	Free text format code	C an3	N		

Segment Notes:

This segment is used to provide free form or coded text information.

Use of this segment in free form is not recommended since it may inhibit automatic processing of the Despatch Advice. Coded references to standard texts is an available functionality which enables automatic processing and reduces transmission and processing overheads. Standard texts should be mutually defined between trading partners and can be used to cover legal or other requirements.

DESADV Despatch advice message

5. Segments Layout

Segment number: 43

EDIFACT	GS1	*	Description
			E.g. packed meat traceability.

Segment Notes:

This segment may be used for 3 distinct purposes.

- 1. This segment is used to identify the location of delivery for a split delivery despatch advice.
- 2. This segment can also be used to identify a delivery location for a specific line item which might be different to the delivery location specified in the NAD or LOC segment in the heading section.
- 3. This segment can be used as well to specify traceability information for a specific line item. E.g. in the case of a meat product the processing country or processing facility in order to comply with legal requirements. It is recommended that GLN Format n13 be used to identify delivery locations.

Example:

LOC+7+5412345678908::9' LOC+244+BE+++6'

SG20	- C	100 - LOC-NAD-DTM-QTY
NAD	- C	1 - Name and address

Function:

A segment for identifying names and addresses and their functions relevant to the delivery point.

It is recommended that where possible only the coded form of the party ID should be specified, e.g. the buyer and seller are known to each other, thus only the coded ID is required. The consignee or delivery address may vary and would have to be clearly specified, preferably in structured format.

3055	Code list responsible agency code	C an3			

Segment Notes:

This segment is used to provide markings and labels information relevant to the product identified in the LIN segment.

If the date is machine readable, the DTM segment below should be used. If the date is human readable DE 7102 in this segment should be used.

Example:

PCI+33E

The following codes apply: 0 = Released - informs the stockholder it is free to distribute the quality controlled passed goods already despatched or ready to be despatched. 1 = Quality Control Held - instructs the stockholder to withhold distribution of the goods already despatched or ready to be despatched until the manufacturer has completed a quality control assessment. Usually the stockholder will receive the whole consignment and the manufacturer will run quality control tests on production batches contained in the consignment. Once the manufacturer completes a positive quality control assessment, it communicates by other means a quality assurance certificate which releases the goods for further distribution by the stockholder. 2 = Quality Controlled Embargo - instructs the stockholder to withhold distribution of the goods already despatched or ready to be despatched, when some of the goods of the same production batch as goods contained in the consignment have failed quality control tests.

SG17	- C	9999 - LIN-PIA-IMD-MEA-QTY-ALI-DLM-DTM-FTX-MOA-SG18-SG20-SG22-SG25
SG25	- C	10 - QVR-DTM
QVR	- M	1 - Quantity variances

Function:

A segment identifying a quantity variance and the reason for the variance.

		EDIFACT	GS1	*	Description
C279	QUANTITY DIFFERENCE INFORMATION	С	O		
6064	Quantity variance value	M n15	M		Specify the actual variance amount here.
6063	Quantity type code qualifier	C an3	R	*	21 = Ordered quantity 66 = Committed quantity
4221	Discrepancy nature identification code	C an3	0		BP = Shipment partial - back order to follow CP = Shipment partial - considered complete, no backorder
C960	REASON FOR CHANGE	С	O		
4295	Change reason description code	C an3	O		WR = Temporarily unavailable
1131	Code list identification code	C an17	O		
3055	Code list responsible agency code	C an3	D		9 = GS1
4294	Change reason description	C an35	0		

Segment Notes:

This segment is used to specify any variances between what was ordered and what is ready for or has been despatched.

The quantity identified in DE 6064 must always refer to the difference between the despatched quantity identified in DE 6060 of QTY at LIN level and the ordered quantity. For negative values (e.g. damaged goods not accepted) the variance must be expressed as negative.

Example:

QVR+-50:21'

The QTY at line level identified the fact that 450 units were ordered and that 400 were being despatched, so therefore the quantity variance is 50 units.

Segment number: 55

6. Examples

The following is an example of a Despatch Advice message providing a description of a consignment of goods to be despatched by the supplier of the goods, identified by GLN 5411234512309. The buyer of the goods is identified by GLN 5412345000013 and the warehouse where the goods are to be delivered is identified by GLN 5412345123453.

The Despatch Advice, reference number DES587441 is sent on the 1st April 2002. The goods to be despatched are a complete shipment of the goods purchased on the 25th March 2002 according to the buyer's purchase order number 12332. They are to be despatched on the 3rd April and are scheduled to arrive on the same day.

The despatch advice refers to a consignment of goods to be despatched, containing 2 pallets, each pallet uniquely identified by an EAN.UCC serial shipping container code.

The first pallet is identified by the EAN.UCC serial shipping container code 354107380000001051 and contains 20 cartons of the product identified by GTIN 5410738000152. The pallet is a standard 800mm x 1200mm pallet with a gross weight of 263.2 kilograms.

The second pallet is identified by the EAN.UCC serial shipping container code 354107380000001068 and contains 5 cartons of the product identified by GTIN 5410738000169, 3 cartons of 5410738000176 and 12 cartons of 5410738000183. The pallet is a standard 800mm x 1200mm pallet with a gross weight of 305.1 kilograms.

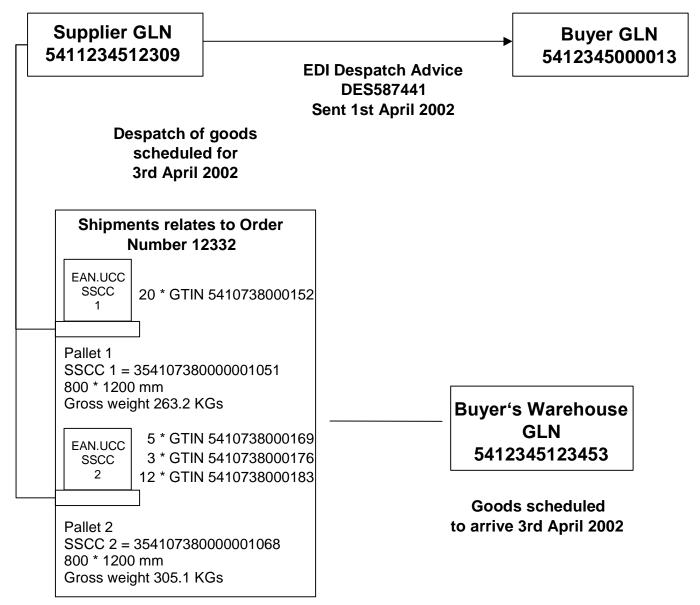

The despatch advice describes the consignment as being composed of two pallets, providing for each pallet a description of the type of pallet in terms of dimensions and weight as well as the pallet's unique identity number (serial shipping container code). The content of each pallet is then described in terms of the standard despatch units it contains.
